Magdalena Skipper is Editor in Chief of Nature and Chief Editorial Advisor for the Nature Portfolio. A geneticist by training, she holds a PhD from University of Cambridge, UK. She has considerable editorial and publishing experience, having worked as Chief Editor of Nature Reviews Genetics, Senior Editor for genetics and genomics at Nature and Editor in Chief of Nature Communications. She is passionate about mentorship, research integrity, as well as collaboration and inclusion in research. As part of her desire to promote underrepresented groups in research, in 2018 she co-launched the Nature Research Inspiring Science Award for women early-career researchers.

### Topic

**"Europe can seize the opportunity through investment in knowledge societies and the role of Guild"**

The research community often refers to itself as an ecosystem and yet it fails to embrace the fundamental qualities that make an ecosystem healthy, robust and resilient to perturbations. Making the most of the rich diversity of stakeholders, and their unique contributions to the ecosystem, researchers can enhance the value of their output, the impact and relevance of their work, and enhance trust in science.
